Ok guys this is a serious thread

I have a close rapport (*shuychus* in yiddish) with **the.guard** and the tech support team, and he requested that if anyone has any issues, they should please post it on this thread, and I will try pass it on promptly

1. **Important:** Please specify the 'bug' with as much detail as possible. e.g. what device you are using, where you see the issue ~~what mood you were in, which bug spray did you try,~~ and so on. E.g. "Chat on my Mobile Device (Specify what model) there's this blue chat circle..."

**Warning: Spoiler!**

"

2. **Update:** Reply here after you see the issue is resolved on your end. So I can report that the bug is successfully [vanquished](#)

Quote button not working properly

Can I quote you on that?

Didnt say not working . said not working properly.

Couple of my quotes this morning only worked after me trying 4-5 times

Now that's what I call commitment.

I cant have people ascribing some of my nonsense to other people

I don't want to hijack this thread, so my ISSUE is that I don't know what you're talking about.  
Maybe you meant a different word; not ascribe?

While we're complaining about the homepage, there's no link on the main GYE homepage to click into the forum homepage. I think there used to be one but it disappeared a while back.

It seems that the forum is actually shown lower down on the homepage. I am wondering why the flight to freedom program is featured on top, although it may sound like a nice plan with all the research, however I'm not sure how much research was based on our forum crowd.

As reality goes, I believe the forum has delivered much more substantial success than anything else so I would think that should be put at the top of the homepage for new users who login and for guys like our friend monster trucker

Start a petition to move the forum button to the top of the home page?

Took me a while to find it all the way down there.

Cannot update my streak. It asks questions about length of streak but the finish button won't do anything and screen freezes.

Also the 90 day chart doesn't work. No update button. Both the progress tracker and 90 day chart are broken.

When using SOS on phone, takes a long time for it to update the urge level and either update or end the session. Is this an issue with my phone only, or is it due to being on a mobile platform.

Thank you.

I'm trying to send a private message to someone, and I'm not able to. When I click on the speech bubble icon, or click on a link in a GYE email to respond to a PM, it takes me to a blank page (see attached screenshot), & when I go to someones profile, it doesn't show an option to send them a private message (see attached screenshot in next post).
