

Bugs & Issues - Please report here
Posted by Markz - 28 Sep 2016 02:57

Ok guys this is a serious thread

I have a close rapport (*shuychus* in yiddish) with **the.guard** and the tech support team, and he requested that if anyone has any issues, they should please post it on this thread, and I will try pass it on promptly

1. **Important:** Please specify the 'bug' with as much detail as possible. e.g. what device you are using, where you see the issue ~~what mood you were in, which bug spray did you try,~~ and so on. E.g. "Chat on my Mobile Device (Specify what model) there's this blue chat circle..."

Warning: Spoiler!

"

2. **Update:** Reply here after you see the issue is resolved on your end. So I can report that the bug is successfully [vanquished](#)

Il don't mean to burst your bubble, especially if it helps you stay clean, but the moderators regularly edit out various things, such as overly triggering content or content that might reveal our identities, protecting us from ourselves.

If injustices were committed, having them wiped off this forum is not a sign that all is fine and dandy.

finally, another guy that stutters.

finally, another guy that stutters.

Shared experience is a very powerful thing.

In terms of the invisible text thing. On iOS I find that it is only present once I scroll down so my keyboard doesn't block the text anymore.

i remember now why i don't go on the forum from my computer.

all you hear are beeps and beeps.

the chatty thingy can drive one crazy.

then it says that mrimgonnastopthismasturbatin'now is chattin you, so you click and there's nothin' there.

then it beeps again.

then it has the red thingy box which says "four new messages," and you click and there's only one.

the thingy keeps countin' up and there ain't any more.

then after you minimize the damn thingy, it opens up again.

back to mobile.....oh, i can't post there....oh well, it's better than the damn beepin'!

and this "ask us anythin'" box that keeps poppin' up.

i minimize and then boom, it shows up again.

it's like that wham a slam game that never runs outta time.

and then you wonder why we have new members for a day or two and then adios. [by the way, i can't even see what im typin' for the "start a live chat with a gye representative" box is coverin' the text.] and here we thought that it was anon 4.1 with his prince song that was drivin' them away in his little red corvette.

#back2mobile

I noticed a new bug with the app. External links are blocked on the forum to prevent people from using the app to access other sites. However I found a way to access the whole web through the app. (Google, YouTube, etc...).

I don't want to post publicly any identifying details. (????? ????)

Is there a way I can provide that info privately to the developer? Should be a easy fix to only allow GYE's subdomains.

On a side note: I just updated my pizza shop's app. Wanting to see what's new, I checked the release notes. It said: "We squashed some bugs." You better believe I'm not eating there again.

So, how does one quote a post from one thread and post onto a different thread when he is using phone, and still have it appear normal?

regular browser, not gye app.

It's not even 12.

But one has years to do those 12 steps.

Why!, so many fellows here are workin' it for month after month, and year after year, and soon they will be ready for step 3.
