Fast is probably relative. Myl sponsor got me there faster, but I'm not comparin' or contrastin', just sayin' (put it in that thread). For all I know, I did a lousy job and I probably did. My sponsees were similar as well. Re: Bugs & Issues - Please report here Posted by Shlomo24 - 08 Dec 2016 03:19 Yeah. I meant fast for me. Send me an email (<a href="markzgye@gmail.com">markzgye@gmail.com</a>) with details of the problem please so we can have it checked out

App has been updated, problem still persists. I do get now a toast message "No application installed to handle that link, please install a webbrowser" however pages still load.

Re: Bugs & Issues - Please report here Posted by cordnoy - 22 Dec 2016 06:16 Sometimes, when you hit reply on a mobile, you only get the typin' box without the box with the keys (source, bold, spoiler, link, etc.), and the text while one is typin' is different, sort of like typewriter text. Re: Bugs & Issues - Please report here Posted by Markz - 22 Dec 2016 14:06

I assume you're seeing that when you reply in the "Recent-posts" page only - correct?

## **GYE - Guard Your Eyes** Generated: 25 August, 2025, 15:54 Is that a new app? What is typewriter Warning: Spoiler! Re: Bugs & Issues - Please report here Posted by cordnoy - 22 Dec 2016 14:17 Yes. In the recent posts, like right now. It seems that the text is appearing as if it would by clicking source code. Re: Bugs & Issues - Please report here Posted by Gevura Shebyesod - 22 Dec 2016 17:36

That happens on PC too, when you reply from the Recent Posts. You get a plain typing box with no tool buttons.
