

You know you're on GYE for a while when...

Posted by ZemirosShabbos - 07 Mar 2011 18:02

1. there are no DEAD batteries, only powerless ones
2. you count the steps going to the second floor and there are only 11 steps. You call a contractor...
3. You kid runs in saying he fell, you say "fell shmell"
4. You tell your friend that you called because you 'Just wanted to say hi' and hang up
5. sometimes you feel that now you are 'Just Having Fun'
6. every Gerrer chusid gets surreptitious looks, 'maybe he is the heiliger Guard'...
7. when you meet someone new you tell them "hi and welcome, you should be getting the official welcome package soon..."
8. passing roadkill is a meaningful experience
9. if someone says the Bardichever lived 200 years ago, you say 'nuh uh, he lives in Kentucky and drives a big truck and sells ice cream
10. you are at a bris and you hear the baby is named 'Dov' and you go over to the baal simcha and say that is a beautiful name, he asks "why so?" and you say ummmm, well you see, it's a long story, not for now and change the subject

11. you go in to meet an adam gadol and he asks you how things are going, you say "Baruch HaTatty"

12. you are at the grocery and you stop at the 7up and start grinning

carry on folks, if we get to 90 then we can be on the chart

You know you're on GYE for a while when you notice that this thread is being used for a different purpose than that which it was created for, and you know the term for it as well, it's called a "hijacking".

Hmm... how was this thread hijacked?

I laughed out loud from those last few..

The Science of a "lol" and Lust

"lol...lool...loool...looooo...loooooo...looooooo"

That above is a mashal for lust. You see when you start off you have a very nice, cute, and perfectly symmetrical "lol"

You see how one perfect little "l" is followed by an "o" which is then followed by an "l". Beautiful Symetrify

Now when you add all the extra letters for an out of whack sex-drive.

Then sadly, the "lol" isnt symetrical... and thats not funny.

As long as there's an even number of "o"s it's still symmetrical. When there's an odd number...then it's odd ??? :o

And I know I've been on GYE way too long when it's after bedtime and I post nonsense that I have no idea what i meant...

Watch who you're messing with, RT. If there's anyone here who knows math, it would be Gevurah

[Gevura wrote on 04 Oct 2011 21:08:](#)

I just did the math

Gevura!

P.S. See [Here](#) and [Here](#).

P.S.S. The second link isn't linkidized, I spent AGES looking for that post Gevurah made where he calculates exactly how long it would take to reach 90,000,000,000,000 hi's. Where is it?

And RT, you're right, but you would have to slice one of the o's down the middle, and all the Woodford will leak out.

See berachos 4a last Rashi on the page - it's mashma from there that everybody must be in bed by **10:00 PM** (unless one is not planning to go to bed that night).

Hmm.. It would seem that everyone has some good kashes on my theorem.

Some are based on "math" and "logic".... some are based on Woodford...

I have one thing to say.

Science is science and can not be disproven with mere "facts" and "logic"

Thank you
