Was clean for 4 weeks Posted by StartingOver - 19 Sep 2014 05:16
I started dating a new woman and I was clean for four weeks. Didn't look at porn once (some provocative pictures) and barely touched myself. I screwed up last last two days. I looked.
The woman I am dating told me that she broke up with a guy who admitted he had a porn addiction.
I thought I was over this.
Not sure what to do right now
