

Looking for a good tool-software to block an Ipad

Posted by benblum - 07 Nov 2016 01:01

Hello,

I am trying to build fences. I installed Covenant Eye on all my computers and laptop and since then it works great! I never fell through these devices. My phone is not relevant as it is a blackberry. The problem is that I have an Ipad at home. Covenant Eye does not offer accountability on tablet yet. In the meantime, I need to install some kind of accountability system on the ipad as 100% of my falls are through it. If only I could install an accountability software on the Ipad and find a way to make it kosher with no access to adult content, I could have a chance to reach the 90 days. Otherwise, my yester hara knows that it is available there and of course push me towards it. Let me know if you have any suggestion. I noticed that from the moment I installed Covenant eyes on my computers and laptop, automatically I was protected. Let me know

Ben

Technology Awareness Group, an organization that helps people install filters on their devices. A list of phone numbers for all their locations can be found here: <http://www.taghelpline.org/>

Hatzlacha!!

Shoot

I thought it was the

"Technology Addiction Group"

For addicts that are tech savvy like myself who know how to play Tag and call them up for a filter and then find all the loopholes...

Hey Benblum I'm not giving you any ideas, but if after you call tag it happens that your truck is still stuck, give us a call right away please!

If tag can't help you, then just watch porn.

???? ?????? ??????

Yes

Cordnoy is not the LOR of GYE, so you can't follow his halachic rulings. Ask your Rav

Cordnoy is one of the LOR of sobriety!!

If you call Tag, setup basic filtering and follow basic shemiras einayim you should be good.

If those don't work you can take 2 roads

1) Downhill: Keep looking for newer, better, stronger filters. Put 10 foot thick walls so you don't see a woman again (All these are obsessions about women so it'll keep you falling downhill)

2) Uphill genuine recovery. Call Cordnoy or any other successful Trucker

Can I ask you a question, and it's for my benefit too because my daughter wants an ipad

Can you not have someone else hold the password for the device? I'd think it's possible to have it protected even without Tag. Am I mistaken?

Also if you use internet on the ipad, you can lock safari and use the covenant eyes app. Do these work?

Apple itself has a really good restriction software. You can block porn, the app store, safari...

Yes but if you apply the restriction and you also by pass them. I know to restrict it but I would have to ask for someone to choose the password.

My wife has my password

If she wouldn't do it, I'd ask my Rav who i have told about my lust struggle.

Do you want his number?
