Looking for a good tool-software to block an Ipad

_____

Hello,

I am trying to build fences. I installed Covenant Eye on all my computers and laptop and since then it works great! I never fell through these devices. My phone is not relevant as it is a blackberry. The problem is that I have an Ipad at home. Covenant Eye does not offer accountability on tablet yet. In the meantime, I need to install some kind of accountability system on the ipad as 100% of my falls are through it. If only I could install an accountability software on the Ipad and find a way to make it kosher with no access to adult content, I could have a chance to reach the 90 days. Otherwise, my yester hara knows that it is available there and of course push me towards it. Let me know if you have any suggestion. I noticed that from the moment I installed Covenant eyes on my computers and laptop, automatically I was protected. Let me know

Ben
