Bb0212's road...
Posted by bb0212 - 06 Feb 2017 14:45

_____

So I'm officially at 10 days. Might be more, pretty sure it's not less, I started my chart after being clean for a few days but I wasn't keeping track. I kinda gave up the long term fight, didn't see how I'd win that fight. However I finally finally finally figured out how to properly filter my phone. I was getting around every filter until a couple of weeks ago. A kosher phone made this seem possible, then I joined these forums so lots of hope here.

One of the reasons I decided to do this is to "be faithful" to whomever my next wife will be, kinda like I was clean for a year or two before my first marriage. Back then, I was only clean after giving up movies/tv. The amount "undercover" sexuality on tv/movies is mind boggling for a society where there's no such thing as sexism. I wonder why we don't see the women's lib protesting the disproportionate amount of female to male sexualizing... (I'm being slightly sarcastic). At some point I'll have to give up movies/tv again and I will. But not yet...

Welcome back. Why not disconnect the cables or router or whatever? How are you doing?

It's been a while. Does anybody know of Windows software that will shut own my internet during certain hours? I need internet OFF on my computer between 12AM-8AM.

Techloq filter has scheduling. They can customize anything you want. (Shut off totally or only email for example...)

I'm doing fine, bh. Not currently depressed which is awesome!

Thank you all for the ideas!

If I disconnect the cables, I won't have any internet until I reconnect them. Which I can do easily.

I'm looking for a free solution. My phone has a filter (Gentech) and it has no internet between 12am and 7am.

I'm looking for something free, I don't want to spend any more on filters right now.

If there is a program that does itfor free, I can create a password that I won't know and put it somebody else's email address as the contact.

_____

There is a couple of options for you. Some routers have such an option in their parental controls.

There is pluckeye which is free and can be set up to block all internet at certain hours. It is a little hard to setup.

Also check out qustodio.

Hatzlacha Rabba!

_____

Thank you lionking! Pluckey works very well!

In other news...

I had an unfiltered chromebook which led to a number of falls, so I sold it.

I had something unrelated kinda terrifying come up later in the day, hopefully it's nothing, I should know by tomorrow I think. Nothing medical. It really pissed me off though, just felt emotionally & unfairly violated. Can't say any more bout that more and hopefully there's nothing more to say.

I wonder what this terrifying thing was. I can't remember, but it's making me curious.

Serves you right for lookin' up old posts.

I guess it truly was nothin', and does demonstrate to us how we shouldn't take things so seriously. Life is filled with stuff that can potentially piss us off.
