

I fell agian

Posted by Helpj - 04 Apr 2019 19:10

Today was day 25 clean.... Untill i found an old unfiltered phone.... After the fall i took the battery and put it in the trash.... For about an hour... Then i went through the trash..... Sad i know..... And fell again.... Im now standing with the battery in my hand unable to throw it away for real.... How can i get the strength to really get rid of it?

You gotta get angry, make yourself angry at this device and what it's done to your life, think how it's destroying you. Once your angry and hate it, it should be easy to get rid of

I was in such a situation a couple of weeks ago and I dropped it in a sewer on the street.

Look for a one way trash.

I threw it away as a knas, can't you filter it?

maybe GYE should branch out and open a free Electrical Company to solve our problems.

gye.con-ed ?
