

Reset longest streak but not current progress

Posted by 01 - 03 Jun 2022 19:17

---

How do I delete my incorrect inputted longest streak, while not resetting my current progress?

I only see one reset button and I think that will reset only the latter, while I only want to reset the former.

Thanks

I don't know how it looks on your end but to the left of any GYE webpage should be a tile called "My 90 Day Count" and it's the second tile from the top. When you click "Update" there it should give you a page where you can input the date you had a setback and if you input that date it should keep your current progress.
