

Up Up We Go

IY”H I will use my fall as an opportunity to grow even more. The change this time is that, even though I somehow pulled off 70 clean days without any kind of filter, I am human, and need one, so I just installed it on all my devices.

It's not a filter that blocks anything, rather it reports it to several people I added, if anything is deemed questionable.

It's called Accountable2You.

Wish me luck. I surely need lots of it!
