

Trying once again - So help me G-d

---

Hi all

No filter or anything else I tried, has reliably helped

It is ironic how my first - and for now, best, by far - streak, was done without any accountability filter, and once I finally added one, I felt squashed, removed it within a few days, and had a fall. That streak was 70+ days

I have since had ups and downs (more downs than ups), with the longest being about 10 days I think

So, for now I am done with trying any content blocking filter, as I can get around them

Nor an accountability filter, as that has not reliably worked for me either

Therefore, it's just me

And you

And of course, G-d

So help me G-d

Is there any solution you think could work for you? If not now, then in time?
