I try to avoid YouTube like the bubonic plague. Because there are so many videos that are  
helpful/interesting/unproblematic it is SO easy to go from one to the next. So I don't go there,  
unless there's something very specific I need. And I don't watch the next one. All my devices  
except one can't get it. It's a personal Geder, but I am sharing, because it has helped me  
tremendously.
