

## GYE CHATROOMS - LOOKING FOR BETA TESTERS

Posted by the.guard - 19 Nov 2011 21:36

---

GOOD NEWS! The long-awaited GYE chatrooms should be functional!

If you want to help us test it and give us feedback, here's what you need to do:

1) Go to: [guardyoureyes.com](http://guardyoureyes.com)

2) Click on Tools > Chatrooms

3) If you're an old timer on the forum (about 6 months ago), log in with your username and password. If not, click register and make a new username and password.

4) Once your registered, we will have to verify you for chatting. Since chatting is more intimate than posting, we have to be extra careful about gender separation. To use chat, you need to have a separate verification. Send us an e-mail to [gye.help@gmail.com](mailto:gye.help@gmail.com) with your username and if we know that you are male, we'll give you access.

5) Once we verify you for chat, you will be able to use it with anyone else who is online.

There is both public chat and private. Public chat can be seen by anyone online. Private chat is one-on-one chatting between members.

There are even special chat-room groups, for example "Married Men". If you are married, you will be given access to this group and can chat with other members in this group about marriage issues.

**NOTE: To chat with someone privately, just click on their name in the public chat window**

**and a new private chat window will open.**

-----

Simple steps to have GYE chatrooms running as a separate application.

1. Download the latest Google Chrome browser.
2. Go to the chatrooms and log-in.
3. Go to Settings (the wrench on the top right) -> Tools -> Create Application Shortcuts.
4. Make shortcuts on your desktop, start-menu, etc...
5. Just click on the shortcut when you want to chat (even if you usually use another browser for your surfing).

I had gone straight to guardyoureyes.com/live/tools/chat-rooms and used the big login/password in the middle of the page, and i got the error above. I reloaded the page and logged in using the small login at the top. it took me to the homepage, and from there i got into the chat. Private chat is working in Firefox.

based on the little experiance on the chat, i can try to say, that the "private chat" will not work with XP or Vista, but, will work with windows 7.

Anyone who has computers on both operting systems, should please try it and ahre their feedback

the system is also not so good, if you type in yiddish (or hebrew).

Vista with IE9:

First i tried the URL directly to the chatrooms [www.guardyoureyes.com/live/tools/chat-rooms](http://www.guardyoureyes.com/live/tools/chat-rooms), which was working earlier, and I got a 404. (Just tried it again and it works). I went to the homepage and logged in, then went to tools, chatrooms. I tried to start a private chat but got a

I also logged in from 2 computers at once to see if i can chat with myself ??? :-\ but i only showed up once on the user list.

i'm bored.....  
system message that private chat is not allowed

It would be very nice if there was a way to know when the person you're talking to is typing, just like on google chat. That way, you know to wait until they're done and only then reply. It can even be taken a step further and there can be a button to press when you're ready for the other person to reply...

not that many people on while i was on

actually no one was on....

but untill then,

it looks pretty nice

I'm confused... I tried getting in to the chat with my regular username and password that I use for the forum and it said it wasn't working.

I guess I'm not doing it right... help please?

The little blue chatroom toolbar disappeared..... I checked with Chrome and Firefox. It never worked with IE.
