

HELP US SPEED UP THE WEBSITE AND WEB DEVELOPMENT

Posted by the.guard - 04 Dec 2011 18:03

We are working hard on the web-development (on the new website at guardyoureyes.com/live/breakingfree) but unfortunately the current "virtual dedicated server" that we have is too slow. We want to upgrade to a real dedicated server, so that our website will be super-fast. Not only will this effect the chat-rooms and the future forums, but it will also allow us NOW to do the web-development quickly. It's \$139 for the cheapest dedicated server on our current host (www.hostgator.com/dedicated.shtml). Does anyone want the big zechus of sponsoring a month of our hosting so we can upgrade TODAY?

It's very urgent because the slowness of our current server is greatly impeding our ability to make progress on the new site. We want to upgrade already today, if possible.

Tizke Lemitzvos!
