

GYE App

Posted by hundredbrachos - 28 Aug 2024 23:02

---

Hi

The GYE app has been crashing on my iphone. Will there be an update to fix this? I dont have a browser

The "submit" button doesn't work on the iPhone app for me, either.

PLEASE FIX

I have an Android phone. I was excited when the GYE app was released, but I was soon disappointed after trying it out. Videos don't play at all, and most of the app doesn't function. I have a filter with apps only (Gentech), so I can't use the browser to go to GYE's website on my phone. I hope they fix the problem soon.

Which app are you using? The yoman app plays videos just fine, but cannot access the forums. The original Gye app accesses the forums but has issues with video playback.

Have the yoman app on an Android and all features work perfectly fine.

Yep, just checked forum started working. Originally it used to load in a browser when clicking on a topic or post.

Back button still doesn't work on the forums to go back a page.

This might not be the right place to post about it, but i ABSOLUTELY LOVE the new GYE ad that I saw in the Yated this week.

on another note, the "submit" button still doesn't work in the iPhone yoman app....

I also have an iphone, and i dont have a browser so the app wont work.

Does anyone know if i would get the guardyoureyes.com website allowed will it allow me to use forums and all the other stuff or it uses many different domains and stuff (dont even know if im using the right terminology)

I have an iPhone and using the Yoman App. Everything seems to be working besides the chat. I open it up and just loads a blank page. For the other parts off the app I got the links added to my whitelist but unsure why the chat isn't working. Anyone have any ideas?
