

**FORUM SHOULD BE FASTER NOW**

Posted by the.guard - 22 Jun 2010 19:32

---

Since the forum migration and upgrade about 2 months ago, I've been getting a lot of complaints that the forum is slow and/or TIMING OUT in middle of posting... I found out that our website and forum were sharing the server with another 739 sites!

I called my server to complain, and they offered to try moving us to a different server to see if it helps... It seems that we are now on a new server with only another 10 websites.

I hope you will all notice a change in SPEED now on the forum. Let me know if you indeed feel a difference in a day or two.

I hope this helped!!
